The Cover-All Difference!

Personalized Service

Our size is our strength. You will not be one of hundreds of nameless customers; our employees will know you by name, and you will get to know them. We treat every client, from FP200 companies, to small and medium sized businesses, with the same exceptional level of service. As a mid-sized MSP, we do not have the overhead associated with larger MSP's. You will realize decreased costs, high availability, and improved service.

Vendor Independence

Cover-All is not tied to any specific software or hardware vendor. This means you can continue using the software you are currently using. No need for costly employee retraining and no unnecessary added costs during transitions. In cases where you are looking to implement new software, our vendor independence means we will always recommend the product that best meets your needs.

Trusted Security

Cover-All's state-of-the-art Data Centre is one of the most secure locations to host your systems, network, applications and data. With our N+1 redundant systems, you will never need to worry about the interruption of service or the safety of your data. All of our services are hosted in the Cover-All Data Centre which is SOC 2[®] compliant and ISO 27001 certified. Ask us why leading Canadian companies trust Cover-All Managed Cloud and IT Services.

Competitive Subscription Pricing

At Cover-All, we charge your business an all-inclusive monthly subscription fee to ensure you stay on budget. Other Managed Services Providers (MSP) may charge a higher rate and also add on many additional fees after they have your business. At Cover-All, it's "all covered" with one flat monthly rate – no surprises!

IT expertise at your fingertips

We have a wealth of long-term in-house talent with decades of experience guaranteeing you continuity of service. Our employees are always looking for opportunities to save your business money, and when something makes sense, they make recommendations that can save you hundreds or even thousands of dollars a month.

Cover-All's cutting-edge Data Centre

Our Data Centre is 11,000 square feet of raised computer room floor space. Access is restricted by a monitored, dual authentication bio-metric physical access system and camera surveillance into the Network Operations Centre and throughout the entire building. It includes digital recording of all motion, including monitoring all exterior building entrances and the raised computer room floor. Our Data Centre is staffed and monitored 24/7/365 and is SOC 2[®] compliant and ISO 27001 certified.

Cover-All has built-in multiple layers of redundancy at every level, including physical, environmental, and network specifications, to keep your systems, network, applications, and data safe. With a 99.99% availability, you can rest assured that we will keep your IT environment running smoothly.

We're here for all of your Managed Cloud and IT Services needs

Managed Cloud Services

Help you build the optimal cloud for your business success.

Cover-All's cloud specialists will get to know your business, designing the right cloud environment to meet your unique business needs. You will realize lower costs, improved security, and rapid scalability. Cover-All has partnered with IBM Cloud through its Services and Solutions Provider Program to give our clients access to innovative IBM Cloud technologies with the added benefit of Cover-All's personalized service.

Cyber Security Services

Leverage the Strategic Alliance between Cover-All & CyberWolfe!

As the sophistication of corporate information technology environments increase, so too does the ability of cyber security criminals who adapt quickly to develop new ways to penetrate corporate and public systems. As these threats increase in frequency and scope, organizations recognize the need to address and manage this risk. The first step is an assessment. Call us to schedule an assessment.

Managed Mainframe(z/Server) Services

Trusted by leading Canadian companies.

Our team of mainframe experts will look for opportunities to reduce your capital and operating costs while improving your mainframe functionality. Leading Canadian businesses trust Cover-All to host their mainframes, leaving you in good company.

Mid-range and Open Systems Services

Personalized service saves you time and money.

Cover-All supports all major mid-range and server/open system software platforms. Our IT experts have decades of experience managing virtually every platform and will look for opportunities to save you money.

Co-Location Services

More robust facilities increase availability.

Cover-All's co-location services provide you with a cost effective way to host your IT infrastructure in a SOC 2[®] compliant and ISO 27001 certified Data Centre. We offer various co-location options including cabinets, cages, and suites. With multiple layers of redundancy and 99.99% availability, we can ensure you have high availability of your IT infrastructure.

Backup & Recovery/DR Services

Experience building strong plans to protect your business.

Cover-All has decades of experience developing, testing, executing and auditing disaster recovery plans for our clients. Our IT experts help companies of all sizes prepare for potential disasters, improving their business resiliency.
